About This Sample Questions Booklet

On behalf of the National Assessment of Educational Progress (NAEP), I want to thank you for your participation in this essential measure of student achievement in America. NAEP tells us what students in our country know and can do. In the coming year, fourth-, eighth- and twelfth- graders will participate in NAEP. Fourth-graders will take civics and U.S. history, and participate in field tests for reading and mathematics.

Assessments require about 90 minutes of a student's time, and students only answer questions in one subject. The test booklet contains 50 minutes of test questions and a brief background section. This booklet features sample questions, selected responses, and background questions to help give you a better understanding of what the assessment is like.

NAEP is voluntary and confidential. Students' answers to all questions are confidential and student names are removed from all assessment materials prior to the materials leaving the school. Individual student scores are not reported.

Results of the civics and U.S. history assessments will be released in the Nation's Report Card in the spring of 2007. They are widely discussed in the press and are used by policymakers, educators, and researchers to make decisions about education policy and funding.

If you have any questions or comments regarding NAEP or would like to view previous *Nation's Report Cards*, please visit the NAEP web site at <http://nces.ed.gov/nationsreportcard>. Also available through the web site is a Questions Tool (<http://nces.ed.gov/nationsreportcard/itmrls>) which will allow you to review additional sample questions with sample answers.

Peggy G. Carr, Associate Commissioner
Education Assessment
National Center for Education Statistics

NAEP is administered by NCES, a principal component of the U.S. Department of Education's Institute of Education Sciences. Policy for the assessment, including its content and standards, is set by the independent, bipartisan National Assessment Governing Board (www.nagb.org).

The Civics Assessment

The NAEP civics assessment encompasses three interrelated components: civics knowledge, intellectual and participatory skills, and civic dispositions. The knowledge component of the assessment is expressed in five fundamental questions:

- What are civic life, politics, and government?
- What are the foundations of the American political system?
- How does the government established by the Constitution embody the purposes, values, and principles of American democracy?
- What is the relationship of the United States to other nations and to world affairs?
- What are the roles of citizens in American democracy?

The NAEP civics assessment is also designed to measure the intellectual and participatory skills students need to face the challenges of public life in a constitutional democracy. Central among these are the abilities to describe, explain, and analyze information and arguments, and to evaluate, take, and defend positions on public issues. The third area of the assessment, civic dispositions and participatory skills, refers to the rights and responsibilities of citizens as members of society.

The assessment is made up of multiple-choice, short constructed-response, and extended constructed-response questions. The constructed-response questions make up approximately 40 percent of the assessment time. For more information regarding the civics assessment framework please visit <http://nagb.org>.

NAEP Civics Framework Distribution of Questions Pool Across Areas of Civic Knowledge

Grade	Civic life, politics, and government	Foundations of the American political system	The Constitution and the purposes, values, and principles of American democracy	Relationship of the United States to other nations and to world affairs	Roles of citizens in American democracy
4	25%	20%	15%	10%	30%

The U.S. History Assessment

The assessment is organized around three concepts or dimensions: major themes of U.S. history, chronological periods of U.S. history, and ways of knowing and thinking about U.S. history. The themes and periods of U.S. history function as a matrix, with the assessment addressing the role of the themes across the periods.

Distribution of Question Pool Across Historical Themes

Grade	Themes			
	Change & Continuity in American Democracy	Gathering & Interactions of Peoples, Cultures, & Ideas	Economic & Technological Changes & Their Relation to Society, Ideas, & the Environment	Changing Role of America in the World
4	25%	35%	25%	15%

Eight chronological periods that overlap and vary in depth of coverage are included in the assessment:

- Beginnings to 1607;
- Colonization, settlement, and communities (1607 to 1763);
- The Revolution and the new nation (1763 to 1815);
- Expansion and reform (1801 to 1861);
- Crisis of the Union: Civil War and Reconstruction (1850 to 1877);
- The development of modern America (1865 to 1920);
- Modern America and the World Wars (1914 to 1945);
- Contemporary America (1945 to present).

Questions include multiple-choice, short constructed-response, and extended constructed-response formats. Constructed-response questions make up approximately 50% of the assessment. The cognitive dimension of historical thinking is measured by the inclusion of test questions divided between those measuring historical knowledge and perspective (40%) and those measuring historical analysis and interpretation (60%). Many questions in the assessment are based on visual or textual stimuli. For more information regarding the U.S. history assessment framework please visit <http://nagb.org>.

Civics and U.S. History Booklet Directions

In each of the next two sections, you will have 25 minutes to answer a series of questions about history or civics. You should think carefully about your answers, and you should use the entire 25 minutes to complete each section.

You will be asked to respond to several different types of questions. Some of the questions will require you to choose the best answer and fill in the oval for that answer in your booklet.

For other questions, you will be asked to write short answers on the blank lines provided in your booklet. Here is an example of a question that requires you to provide a short answer.

Example 1

Who was Thomas Jefferson and why was he important? Try to identify two reasons.

Jefferson was the third U.S. President. He was the main writer of the Declaration of Independence and he bought the Louisiana territory from France.

GO ON TO THE NEXT PAGE

Also, you will be asked to answer other questions by writing longer, more detailed responses on a full page of blank lines. For example, here is a question that requires you to provide a longer answer.

Example 2

Explain three reasons why the early English settlers of New England left home to journey to North America.

The early English settlers left home for three reasons. Many of them wanted religious freedom because the King would not let them practice their faiths. Some were looking for more land or a way to make a better living because they were poor or hadn't inherited any land. Others hoped to set up a whole new society better than the one they left behind.

When you are asked to write your response be sure that your handwriting is clear. Think carefully about each question and make your answers as complete as possible, using as many lines as you need.

Finally, in some questions you may be asked to draw maps, graphs, charts, tables, or timelines.

If you finish before time is called, be sure to read your work again and change anything that you think will make your answers better.

The Mathematics Assessment

The NAEP mathematics assessment measures students' ability to solve problems in five mathematics content strands: Number Properties and Operations; Measurement; Geometry; Data Analysis and Probability; and Algebra. Within each of these five content strands, students are asked questions that involve low, moderate, and high mathematical complexity.

The NAEP mathematics assessment includes multiple-choice questions, short-answer constructed-response questions, and extended constructed-response questions. The extended exercises allow students to communicate their ideas and demonstrate the reasoning they used to solve problems. The short-answer and extended-response questions make up approximately 50 percent of student assessment time. The assessment also incorporates the use of calculators, rulers, protractors, and ancillary materials such as spinners and geometric shapes in some parts of the assessment, but not all.

Calculator use is permitted on approximately one-third of the test questions (four-function calculators at Grade 4). NAEP provides calculators for all students. At Grade 12, students may use their own scientific or graphing calculators. For more information regarding the mathematics assessment framework please visit <http://nagb.org>.

NAEP Mathematics Framework Distribution of Questions Across Content Strands

Number Properties and Operations	40%
Measurement	20%
Geometry	15%

Mathematics Booklet Directions

This assessment uses many different booklets. Each booklet has different questions. Do not worry if the person next to you is working on questions that do not look like those you are working on.

Read each question carefully and answer it as well as you can. Do not spend too much time on any one question.

For some of the questions you may need to write or draw the answer. You can see how this is done in the example below.

You may be given a calculator to use for at least one part of your booklet. If you are given a calculator, you will have to decide when to use it in each section where its use is permitted. For some questions using the calculator is helpful, but for other questions the calculator may not be helpful. After each question you will be asked to indicate whether you used the calculator.

When you receive the calculator, make sure you know how to use it. There are instructions on the back cover of this booklet to help you. If the calculator does not work or if you do not know how to use it, raise your hand and ask for help.

REMEMBER:

Read each question CAREFULLY.

Fill in only ONE OVAL for each question or write your answer in the space provided.

If you change your answer, ERASE your first answer COMPLETELY.

CHECK OVER your work if you finish a section early.

Do not go past the

sign at the end of each section until you are told to do so.

The Reading Assessment

The NAEP reading assessment measures students' ability to understand, to interpret, and to think critically about different types of texts. Recognizing that readers vary their approach according to the demands of different types of text, the NAEP framework specifies the assessment of reading in three contexts: reading for literary experience, reading to gain information, and reading to perform a task. (Reading to perform a task is not assessed at Grade 4.) The assessment comprises reading materials selected from publications and other resources typically available to students in and out of school.

Across the three contexts for reading, students are asked to demonstrate their understanding by responding to comprehension questions that reflect four different approaches to understanding text. The NAEP framework accounts for these different approaches by specifying four aspects of reading that represent the types of comprehension questions asked of students. Forming a general understanding questions ask students to consider the text as a whole. Developing an interpretation questions ask students to discern connections and relationships within the text. Making reader/text connections questions ask students to connect information from the text with prior knowledge and experience. Examining content and structure questions ask students to critically evaluate the content, organization, and form of the text. All four aspects of reading are assessed at all three grades within the contexts for reading described above.

The NAEP reading assessment contains multiple-choice questions, as well as short and extended constructed-response questions. Students spend approximately 50 to 60 percent of their assessment time providing written answers to constructed-response questions. For more information regarding the reading assessment framework please visit <http://nagb.org>.

**NAEP Reading Framework Distribution of

Reading Booklet Directions

In each of the next two sections, you will have 25 minutes to read a story, an article, or a document and answer questions about it. You should think carefully about your answers, and you should use the entire 25 minutes to complete each section.

You will be asked to respond to three different types of questions. Some of the questions will require you to choose the best answer and fill in the oval for that answer in your booklet.

For other questions, you will be asked to write short answers on the blank lines provided in your booklet. Here is an example of a question that requires you to provide a short answer.

Example 1

Give an example from the article that shows Mandy was not a quitter.

One example is that Mandy's mother didn't want her to umpire in public, but Mandy persuaded her mother to let her.

Also, you may be asked to answer other questions by writing longer, more detailed responses on a full page of blank lines. For example, here is a question that requires you to provide a longer answer.

Example 2

Explain how Mandy's mother and brother helped Mandy to become the first woman umpire.

Mandy's mother helped her by agreeing to let her umpire at a public ball game. Mandy did so well that the team offered her a job as umpire. Mandy's brother helped her by letting her play baseball with him. He also helped Mandy to persuade their mother to let her play in public.

When you are asked to write your response be sure that your handwriting is clear. Think carefully about each question and make your answers as complete as possible, using as many lines as you need.

You may go back to the story, article, or document when answering any of the questions. If you finish before time is called, be sure to read your work again and change anything that you think will make your answers better.

WATCH OUT FOR WOMBATS!

AS WE RODE ALONG THE HIGHWAY sixty miles northeast of Adelaide, Australia, a diamond-shaped sign suddenly loomed ahead. *Watch Out for Wombats*, it warned. We peered into the sparse scrub along the roadside and searched for the brown furry animals. In the distance we spotted a mob of red kangaroos bouncing out of sight, and near the road a crowlike bird called a currawong was perched, but nowhere did we see any wombats. However, we later found out that this was not surprising because we were traveling during midday, and wombats are active mostly at night. It wasn't until we visited the animal reserve that we finally saw our first wombat and learned more about this funny-looking creature.

We found that there are two types of wombats in Australia: the hairy-nosed wombat, which lives in Queensland and South Australia, and the coarse-haired wombat, which lives along the southeast coast. Both have soft brown fur, short ears, and thick-set bodies. They are said to resemble North American badgers. The hairy-nosed wombat is smaller and has pointier ears compared to its coarse-haired cousin; otherwise they are very much alike.

In many ways the wombat is similar to another Australian native, the koala. Like koalas, wombats have strong forelimbs and powerful claws. But instead of using its claws to cling to high tree branches as the koala does, the wombat digs large

underground burrows. These burrows are usually nine to fifteen feet across, but they can be enormous—sometimes as long as ninety feet. One end of the burrow is used as a sleeping area—there the wombat builds a nest made of bark.

The wombat is a vegetarian, so it also uses its mighty claws to tear up grasses and roots for its food. A mother wombat will pull out single stems of grass and lay them on the ground so her young wombat can eat the tender bases. The wombat's teeth, which grow throughout its

life, are sharp and ideal for cutting and tearing.

When a mother wombat gives birth, she never has to worry about finding a baby-sitter—she simply carries her baby along with her. Like most mammals in Australia, wombats are marsupials. A baby wombat is born at a very early stage of development and lives in its mother's pouch until it is old enough to survive on its own.

Wombats have only one baby at a time, usually during the Australian winter months, May to July. A baby wombat is called a joey. At birth the

tiny joey—barely an inch long—uses its forelimbs to pull itself along its mother’s underside to get into her pouch, where it will be kept warm, protected, and fed.

Marsupials, like all mammals, are nourished by their mothers’ milk. The nipples that supply the milk are inside the pouch. Once inside, the wombat joey finds a nipple and grabs it. The nipple then swells up in the baby’s mouth, providing a firm hold and a steady supply of food. The joey stays in its mother’s pouch for the next four months and grows rapidly.

Most marsupials have pouches which open upward when the animal is standing. However, both koalas and wombats have pouches which face downwards. A strong muscle keeps the pouch tightly closed and

prevents the young wombat or koala from falling out. An advantage of the downward-opening pouch for wombats is that dirt is less likely to get inside when the wombat is burrowing.

The wombat is a shy and gentle animal. But even if you lived in Australia and were willing to keep watch during the nighttime hours, it would be difficult to get to know one. As more and more people move into territories in which wombats live, they destroy the wombat’s burrows and food supplies. In some areas where the wombat was once plentiful, it is now almost extinct. Animal reserves have been set up recently to protect the wombat. Perhaps with a little help these friendly creatures will again prosper and multiply. The next time we drive through Australia, we really may have to *Watch Out for Wombats!*

Student Background Questionnaire

General Directions for Grade 4

In the next two sections, you will be asked questions about yourself and your education. We will read the first section together. To answer these questions, fill in the oval beside the answer that is true for you. For example, fill in the oval beside your answer to this question:

How many movies did you see last month on television and in movie theaters?

- ☐ Ⓐ None
- ☐ Ⓑ 1 to 5
- ☐ Ⓒ 6 to 10
- ☐ Ⓓ More than 10

You should have filled in the oval beside the answer that best tells how many movies you saw last month on television and in movie theaters. On questions like this, be sure to make your answer mark clear and dark in the oval. If you make a mistake or want to change your answer, be sure to completely erase any unwanted marks.

You will be told when it is time to begin and end each section.

Do not go past the  sign at the end of each section until you are told to do so.

If you finish before time is called, go back and check your work on that section only. Use your time carefully. Do as much as you can in each section.

NAEP Questions Tool Tutorial

The **NAEP Questions Tool** provides educators, researchers, parents, and students with access to released questions from NAEP assessments in nearly all subject areas, dating from 1990.

The questions are presented as

- examples of what NAEP asks students in grades 4, 8, and 12;
- examples of questions that probe students' knowledge of specific content areas; and
- a way to examine student performance on a specific question by race/ethnicity, gender, and other student groupings across the nation and, for mathematics, reading, science, and writing.

NAEP has released over 1,000 questions from past assessments to the public, and will continue to release more after each assessment.

How to Access

The direct URL to NAEP Questions is <http://nces.ed.gov/nationsreportcard/itmrls> or click **NAEP Questions** on the Nation's Report Card home page.

How do I search for specific questions?

1. First, click on **Search Options** on the first screen.

Search Options

... to begin using the NAEP Questions Tool.

2. Next, select your question search option and click on **Search** or **Continue**. Note that there are several ways to search for questions.

The screenshot displays the NAEP Questions Tool search interface with three distinct search options, each in a light gray box with a dark header.

- Quick Search:** Features two dropdown menus: "Select a subject" and "Select a grade (default to All)" (with "(optional)" text to its right). Below these is a dark button labeled "Search".
- Advanced Search:** Features a "Select a subject" dropdown menu. Below it is a dark button labeled "Continue...". A descriptive text line reads: "Within a subject, search for questions by grade, content classification, question type, difficulty, and other subject-specific variables."
- Search by Block:** Features two dropdown menus: "Select a subject" and "Select a grade (default to All)" (with "(optional)" text to its right). Below these is a dark button labeled "Continue...". A descriptive text line reads: "Within a subject, search for a specific 'block' or 'booklet' of questions that were administered to students who participated in the NAEP assessment."

3. Questions that match your search criteria will be listed on the next screen. You can then click on any question to view it.

* The 1998 NAEP Writing Assessment included some 50-minute questions at grades 8 and 12. These questions were not included in the NAEP writing scale.

Some NAEP questions are given to students at more than one grade level. These cross-grade questions are referred to as, for example, 4(8) or 8(4), where the first number refers to the focal grade—the grade level/assessment from which the question and related material was drawn—and the second number (the number in parentheses) refers to the other grade level in which the question was also given.

Three Ways to Search for Questions

There are three ways to search for questions:

- quick search,
- advanced search, or
- search by block.

Search

You must choose a subject but, if you do not choose a grade, you will view questions from all grades. When you have chosen a subject or subject and grade, click on **Search**.

Advanced Search

Within a subject, you can search for questions by grade, content classification, question type, difficulty, and other subject-specific variables using **Advanced Search**. First, you must choose a subject and click on **Continue**.

Advanced Search
Within a subject, search for questions by grade, content classification, question type, difficulty, and other subject-specific variables.

Next, select your advanced search criteria. Note that options will differ depending on the subjects you choose.

Question difficulty is determined as follows: for multiple-choice and dichotomously scored (right-wrong) items, easy questions are those with scores greater than 60 percent, medium questions are those with scores greater than or equal to 40 percent and less than 60 percent, and hard questions are those with scores less than 40 percent. For constructed-response questions, separate weights are assigned to each score category.

When you are finished, click on **Search**.

How do I print a question or group of questions?

The NAEP Questions Tool allows users to customize and print NAEP questions. After selecting and saving questions in the **Print Folder**, you can change the question order, delete questions and decide what information you wish to print along with the questions (e.g., scoring guides, content classifications).

Selecting Questions

Select questions to be added to the print document by clicking on the check boxes in the **In Folder** column on the **Search Results** screen. A red check mark appears on each selected check box.

Note: As the check boxes are marked, the number of items in the **Print Folder** is NOT updated. To update the displayed information, click on **To Print Folder** to the Print Folder icon.

Adding All Questions to the Print Folder

Clicking on the **Add All Questions** link on the **Search Results** page automatically adds all the displayed questions to the Print Folder.

Removing All Questions from the Print Folder

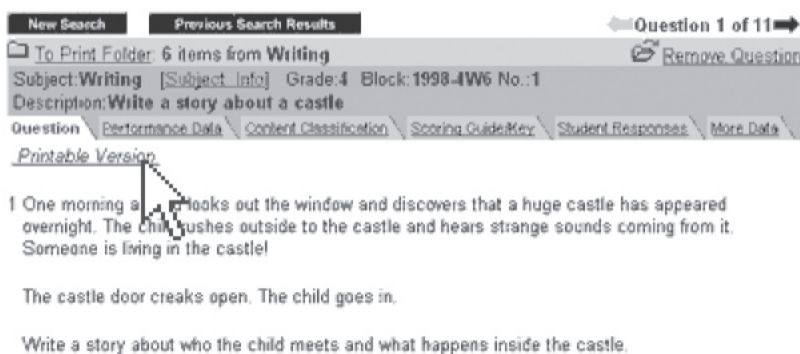

Clicking on the **Remove All Questions** link on the **Search Results** page automatically removes all selected questions from the **Print Folder**.

Printing Individual Questions Directly

Questions are displayed as links on the **Search Options** page. Clicking on a specified question (link) displays the entire question. Clicking on the **Printable Version** link takes you to a screen that has only the question and does not include the NAEP Questions Tool interface. From this page you can print using the browser's print icon.

Adding/Removing Individual Questions to/from the Print Document

You can add or remove questions you are viewing by clicking on the **Add Question/Remove Question** icon on the upper right of the screen. As you add or remove questions, the number of questions in your print folder will be automatically updated.

Printing from the Print Folder

The selected questions are put into the **Print Folder** as one document. Clicking on the **Print Folder** link or icon brings you to a page where you have a number of options for formatting your print document. In the Print Options area, you can select items to include with your questions in the print document (for example, scoring guides/keys, performance data or content classification information). Questions are automatically selected on this page. Once you've selected what you would like to be included in your document, you can click **Assemble Document**. Note: In the print document, underlined text represents text that has been substituted for items that were originally part of a set. For the exact wording of items that were given to students, please refer to the text as represented with the tool itself.

Editing the Print Document

The order in which questions appear can be rearranged in the **Edit** section, so that easy, medium, and hard questions are arranged in an appropriate order. For instance, a teacher might want the easier questions to appear first, followed by medium, then harder questions. A question is rearranged by selecting one question then using either the **Move Up** or **Move Down** arrows to the right to move it accordingly. The change can either be retained by clicking on **Save** or be rejected by clicking on **Restore**. You can also preview a question by clicking on the **View Question** button. A question can be deleted from your document by clicking on **Delete Question**.

What information can I get about each question?

When you select a question to view, a screen similar to the one below will be displayed.

Information related to a selected question is available by clicking the tabs at the top of the screen. This information includes:

Question - Shows the printable version of the question. When the screen first displays, the question will display. Click on this tab to redisplay the question after another choice has been selected.

Performance Data - Shows information about how students scored on the question.

Content Classification - Shows information about how the question relates to the subject area framework. This includes a description of the content domain—what is being assessed—and the cognitive skills within that domain.

Scoring Guide/Key - Shows the scoring guide or rubric for constructed-response questions and the correct answer for multiple-choice questions.

Student Responses - Shows actual student responses to the question for each score level.

More Data - Displays additional data for each item, including how subgroups (gender, race/ethnicity, parents' highest level of education, type of school, region of the country, type of location, Title I participation, National School Lunch Program and achievement level) performed on this question. Provides a link to the NAEP Data Tool, where you can search for more specific national and state NAEP data.

Question - When the screen first appears, the question will be displayed and the **Question** tab will be highlighted. When you are viewing related information other than the question itself, click on this tab to re-display the question.

Links within the question - The question and related graphics or text passages may not fit on the screen area without scrolling. To help you view the different parts of the question, we have added several links above the question on the right side of the screen.

The names of the links may change depending on the type of question and the subject area.

Note that the questions have been formatted to display on the screen and may not be presented in the same way as they were to the student. You can view the questions as they were presented to the student by printing a block of questions in its PDF form.

Performance Data - Shows information about how students scored on the question.

For Multiple-Choice Questions - Shows the percentage of students who answered the question incorrectly or correctly, or who omitted the item.

1998 National Performance Results

Note:

- These results are for public and nonpublic school students.
- Percentage may not add to 100 due to rounding.

For Constructed-Response Questions - Shows the percentage of students who scored at each score level, or who omitted the question or were off-task.

1998 National Performance Results

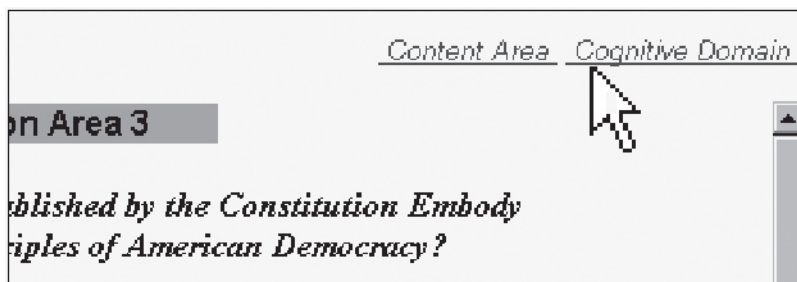

Note:

- These results are for public and nonpublic school students.
- Percentage may not add to 100 due to rounding.

The scoring criteria will vary depending on the subject and type of question. Click on **Scoring Guide/Key** to see a description of the score levels used for each question.

Content Classification - Shows information about how the question relates to the subject area framework. This includes a description of the content domain—what is being assessed—and the *cognitive skills* within that domain.

Use the links on the upper right of the Content Classification screen to move between the sections of the screen. Note that the name of the links will vary depending on subject and question type.

For a more extensive description of the subject area you have chosen, click on **Subject Info** at the top of the screen next to the subject name.

Scoring Guide/Key - Shows information about how the question was scored.

For Multiple-Choice Questions - Shows the “key” or correct answer for the question.

Key	
	In the poem "Finding a Lucky Number," Gary Soto contrasts
	A) dogs and squirrels
	B) present youth and future aging
	C) Indian summer and the coming of winter
	D) eating candy and a healthy diet

For Constructed-Response Questions - Shows the scoring guide used to determine the score for the student's answer.

Use the scroll bar to move between the sections of the screen. Note that student responses are available only for constructed-response questions.

In some subjects, you will find a **Scorer's Commentary** button after the student responses. Each subject offers a different model for the scorer's commentary—some provide one for every response, others for both responses. The scorer's commentary gives you additional information on why the response received the score that it did and often refers back to the scoring guide.

More Data - Shows information about how subgroups of students performed on the question. This information enables you to see comparisons between the subgroups. From this screen you can also link to the NAEP Data Tool (<http://nces.ed.gov/nationsreportcard/naepdata>).

Where can I find more information about the subjects NAEP assesses?

You can find information about each subject by clicking on Subject Info at the top of the screen next to the subject name.

This leads you to more detailed information about NAEP procedures, including a description of frameworks, assessment instruments, scoring, school and student samples for that subject, NAEP reports, and interpreting NAEP results.

You can find even more information about each subject by choosing a subject on the NAEP home page.

Information About National Assessment of Educational Progress

PROJECT MISSION. NAEP is administered by the U.S. Department of Education to report on the achievement of American students in key academic subjects. For more information about the NAEP program, visit the NAEP web site at <http://nces.ed.gov/nationsreportcard> or call 202–502–7420.

PARTICIPATION. States and districts that receive Title I funds are required to participate in biennial NAEP reading and mathematics assessments at grades 4 and 8. Teacher and student participation is always voluntary. Contact your school's NAEP coordinator for more information.

NAEP CONTENT. The National Assessment Governing Board (NAGB) develops frameworks detailing what students reasonably might be expected to know and do for each subject assessed by NAEP. For additional information on framework development, see the NAGB web site at <http://nagb.org>.

SAMPLE NAEP QUESTIONS. For each assessment, some of the test questions, along with performance data, are made available to the public to provide concrete samples of NAEP contents and results. For every assessment, NAEP distributes to participating schools sample questions booklets that provide more detailed information about the assessment design and questions. Released questions and student performance data may be viewed on and downloaded from the NCES web site at <http://nces.ed.gov/nationsreportcard/itmrls>.

SECURE NAEP QUESTIONS. On written request, adults may review NAEP questions and instruments still in use. These arrangements must be made in advance, and persons reviewing the assessment may not remove the booklets from the room, copy them, or take notes. Contact your school's NAEP coordinator for more information.

NAEP REPORTS. NAEP publications can be searched and downloaded from the NAEP web site at <http://nces.ed.gov/nationsreportcard>.

FOR FURTHER INFORMATION. For prompt field staff support on these or other matters, call the NAEP Help Desk at 800–283–6237.
